33	Give us the needed PPE. People keep saying all over the news we have it but we don't. Not at my place I feel. We don't even have n95 masks. We are forced to reuse for a week the same surgical Masks & now told that we can not even wear our own masks. Are we even safe as healthcare workers? If we are not safe the patients are not safe! We are scared to be around family kids etc because we don't want to take home anything or risk our families safety. Some of us stay away from our families. Some of u are scared to lose our jobs. I am allergic to the hand sanitizer & soap in my place of work & they are not even providing a different soap sanitizer for me. I am told I have to bring my own. Which is hard for me to get ahold of now. I think we need a pay raise for what we do NOT just the nurses. We are hand in hand with our patients & our lives are on the line too. We are away from our families & taking care of theirs. Nurses are getting pay raises what about the techs,cnas? All we hear about is the Nurses. Where is the cna/tech hospital worker,essential workers thanks appreciation? Don't we deserve a pay raise as well to provide for our families? This in my opinion would help a lot of us to feel Appreciated. Thank u	5/8/2020 9:47 PM

19	Recognize the Direct Care Workers, CNA,s the hard work we do on the front line. Just don't say the nurses, doctors. We are also important.	5/10/2020 7:49 AM
20	We are doing the best we can with what we have to work with. Our residents are our top priority and we are doing everything we can to keep them safe. We would like the government officials to help keep the workers safe physically, mentally and financially. We are risking our lives and our families lives but compensation seems to shift in the wrong direction. A lot of unanswered questions why can someone be sitting at home whether is willingly or forced be making more \$ then the workers who are still working and fighting to save lives. Seems that the support is not where it needs to be. I am a mother of 3 young adults 17,19,20 they were all laid off due to this virus and I am the sole provider until they are able to go back to work or look for employment. It's very hard to do and still pay our bills please try to understand that workers need more money because honestly no amount is worth a life and saving lives is our main focus so why not take some of the financial stress off essential workers shoulders and let us focus more on safety and taking care of our residents.	5/9/2020 11:01 PM
21	It's killing my residents so fast because we don't have enough rules put into place. Families are in so much pain by their losses. People need to stop having parties (my neighbors), stop shopping for fun, etc. our governor shows she doesn't care	5/9/2020 9:05 PM

26	working in health care that the fear is very real and frustrating because there is being no restrictions/penalty being put on lowan's that are not following the covid guidelines she is just making a suggestion to the public to follow the guidelines . And it is frustrating when she didnt even lock down iowa for even a brief time when she had the opportunity to maby get a better handle on this and less death when so many other states did. I think there would of been a better outcome then what we are going threw now.	5/9/2020 8:20 AM

33	I would like them to know that we are leaving our families to take care of theirs..they could at least make sure that all healthcare workers are provided with PPE. The very best of the PPE. That everyday we leave home we are scared for our lives & our loved ones. That we are not paid enough for what we do. That if we can't take care of our healthcare workers we can't take care of the world. If we have no healthcare workers then who will take care of us?	5/8/2020 9:54 PM

54	Keep people at home that do not work in medicine	5/8/2020 2:53 PM
55	We can't keep using the same N95 masks. They come back uncontaminated but the straps are dried out and break. We try to staple them but they just fall off. Inform the people that wearing a mask for prolong periods of time can cause CO2 to build up in their bloodstream and weakens the immune system and potentially kill them. Tell people to stop with the gloves. People are touching everything with the same pair of gloves. It's just like touching everything without washing your hands. Help people understand we don't need to hoard supplies.	5/8/2020 2:47 PM

85	How scared the residents are from the unknown and unfamiliar ways. Even when working a facility that hasn't been hit with cases. Reynolds was always putting down long term care; since the 1st outbreak was announced. She would say things like this many cases linked to the facility outbreak; and when the outbreak from meat plants emerged; she was quick to ignore at 1st and go back to throwing numbers on the long term cases. I know she releasing the facts; but constantly reminding us of situation of it and her tone she used; it more less felt like she blaming us as a whole.	5/8/2020 12:58 PM
86	PPE shortages affect how we safely do our jobs, and we need sufficient PPE now	5/8/2020 12:57 PM
87	I would like to be tested.	5/8/2020 12:55 PM
88	It's NOT time to open the economy yet. Our numbers are still growing. It'll only get worse if people are going out. Do something about packing plants. Many people are employed by these plants, and many are related to people working in long-term care facilities. It is putting our elderly at risk.	5/8/2020 12:55 PM

93	It's not fair unemployment is getting more money than the people on the frontline caring for your relatives and friends. Risking our safety and that of out immediately family	5/8/2020 12:45 PM
94	Tired of being short of PPE, seeing more things open and the cases still going up. How are we to take care of these people at increasing numbers without supplies. AND why should we when the governor opens things up anyway. Not enough vents, to bad. Not enough gloves, gowns, to bad. Do it without and if you get sick, to bad.	5/8/2020 12:44 PM
