Mouth Care Matters (MCM) was originally designed for home care, hospice, and nurse aides; personal assistants; patient care technicians; and direct support professionals, but the program is also suitable for other health and long term service and support (LTSS) staff including licensed nurses. Taught by dental hygienists who are certified instructors, the program offers practical hands-on skills on how to provide the best oral care possible for lowans of all ages and abilities. One of the greatest take-aways by participants is "a greater understanding about the link between a healthy mouth and one's overall health and well-being."

These Mouth Care Matters in-services are made possible by Central Iowa Works and in-kind contributions from University of Iowa College of Dentistry.
