RE: "Direct Care Disaster" [Jan. 11]: We need to call upon the Legislature to pass House File 106, which calls for the establishment of the Iowa Health Workforce Center to ensure we have a highly qualified and skilled health and long-term care

workforce to meet the needs of Iowans. Access to care is more than having an insurance card or a facility or agency in one's service area. Access to care and support services is not possible without the workforce that make it possible. Millions of dollars have been spent in identifying the problems and recommending solutions. It's time to act.

— DI Findley, executive director of Iowa CareGivers, West Des Moines
